

Marquette Food Co-op

PORK SOURCING GUIDE

We do our best to offer an array of options for pork products at the Marquette Food Co-op. Customers may choose based on price considerations, animal treatment, or farm location. This guide is intended to help you navigate these options and choose the products that best suit your values.

Gestation and farrowing crates on many farms do not allow the pig to move or even turn around. Farms listed as not using gestation and farrowing crates may still separate females and their piglets to ensure safety of the piglets, but they are never placed in pens or crates that prevent them from turning around freely or lying down. They also are able to extend their limbs without touching the side of an enclosure. Please note that this guide covers bacon, ground pork, and many cuts of pork. There may be some pork products not covered in this guide due to the variety of items in the store.
